# Enhancing Critical Business Processes to Enable Efficient Manufacturing Operations

Products and Solutions  
[2nd Gen Intel® Xeon® Scalable Processors](#)

Tabaterra is a leading producer for some of the world’s most famous tobacco brands. Tabaterra is constantly looking to boost manufacturing efficiency while ensuring high levels of environmental sustainability. Tabaterra relies on mission-critical ERP solutions to power its production planning, materials management, finance, quality control, and maintenance activities. Tabaterra worked with Lenovo Services to migrate its existing ERP solution to the SAP HANA in-memory database, running on Lenovo ThinkSystem SR590, SR630, and SR650 servers, featuring 2nd Gen Intel® Xeon® Scalable processors, and a Lenovo ThinkSystem DE4000H Hybrid Storage Array. The company anticipates improved reliability, seamless scalability, and higher performance for its mission-critical business processes.

“Achieving excellence in everything we do is our core principle, which is why we are always looking for new ways to improve operations. As Tabaterra developed, we could see that our ERP solution and supporting infrastructure was ripe for improvement, especially if we were to support future business growth.”

**Elman Javanshir**  
 Director, Tabaterra
