

## Improving Agility in the Workplace with a Virtual Desktop Infrastructure

Intesa Sanpaolo Bank is the Romanian subsidiary of Intesa Sanpaolo Group, one of the top banking groups in Europe, with a significant ESG commitment, a world-class position in Social Impact, and strong focus on climate. When the COVID-19 pandemic prevented staff from working in its offices and branches, Intesa Sanpaolo Bank Romania aimed to accelerate internal adoption of digital channels. To ensure employees can work securely from anywhere, the bank deployed a virtual desktop infrastructure solution running on Lenovo ThinkAgile VX Series hyperconverged infrastructure, featuring 2nd Gen Intel® Xeon® Scalable processors. Today, employees can work remotely or in the office with double the application performance—helping the bank maintain a high quality of service to customers.

“We aimed to ensure that employees could work from home effectively and securely, and we identified VDI as the optimal way to achieve that goal.”

**Gabriel Faur, Deputy General Manager & COO, Intesa Sanpaolo Bank Romania**
