

Cloud Services Provider EXE.IT Helps More Clients Embrace Sustainable IT Services

EXE.IT is an IT services provider that offers virtualized, agile, out-of-the-box solutions. EXE.IT has always shaped its cloud services with sustainability in mind. Now, thanks to a new hyperconverged infrastructure (HCI) from Lenovo and Microsoft, powered by Intel® Xeon® Scalable processors, the company is extending its green edge—making IT more efficient without compromising on performance or scale. To power its green data center and cloud services, EXE.IT wanted an infrastructure platform that packed maximum performance into an efficient, easy-to-manage design. The IT services provider chose the Lenovo ThinkAgile MX Series, which combines Windows Server 2019 Datacenter Edition with Lenovo ThinkSystem SR630 V2 servers as the foundation for a simple yet powerful HCI.

“We designed every element of the O0gate data center with energy efficiency in mind. We wanted an infrastructure that packed maximum performance into the smallest volume.”

**Gianluigi Capra, CEO,
EXE.IT**
