

The Intel Sustainable Intelligence Index

Three key areas need board-level attention for organizations to fully leverage AI technologies to drive sustainable progress: Knowledge, Investment, and Innovation.

The Intel Sustainable Intelligence Index measures sector performance across these three pillars, revealing who is leading the way and who is at risk of falling behind.

Knowledge is the strongest pillar, with the highest proportion of leaders in the 'visionaries' category. Investment is the biggest hurdle to sustainability-related AI, with a fifth of organizations falling behind in this area.

Visionaries_
The companies blazing a trail in sustainability-related AI (in the top third of the scoring range).

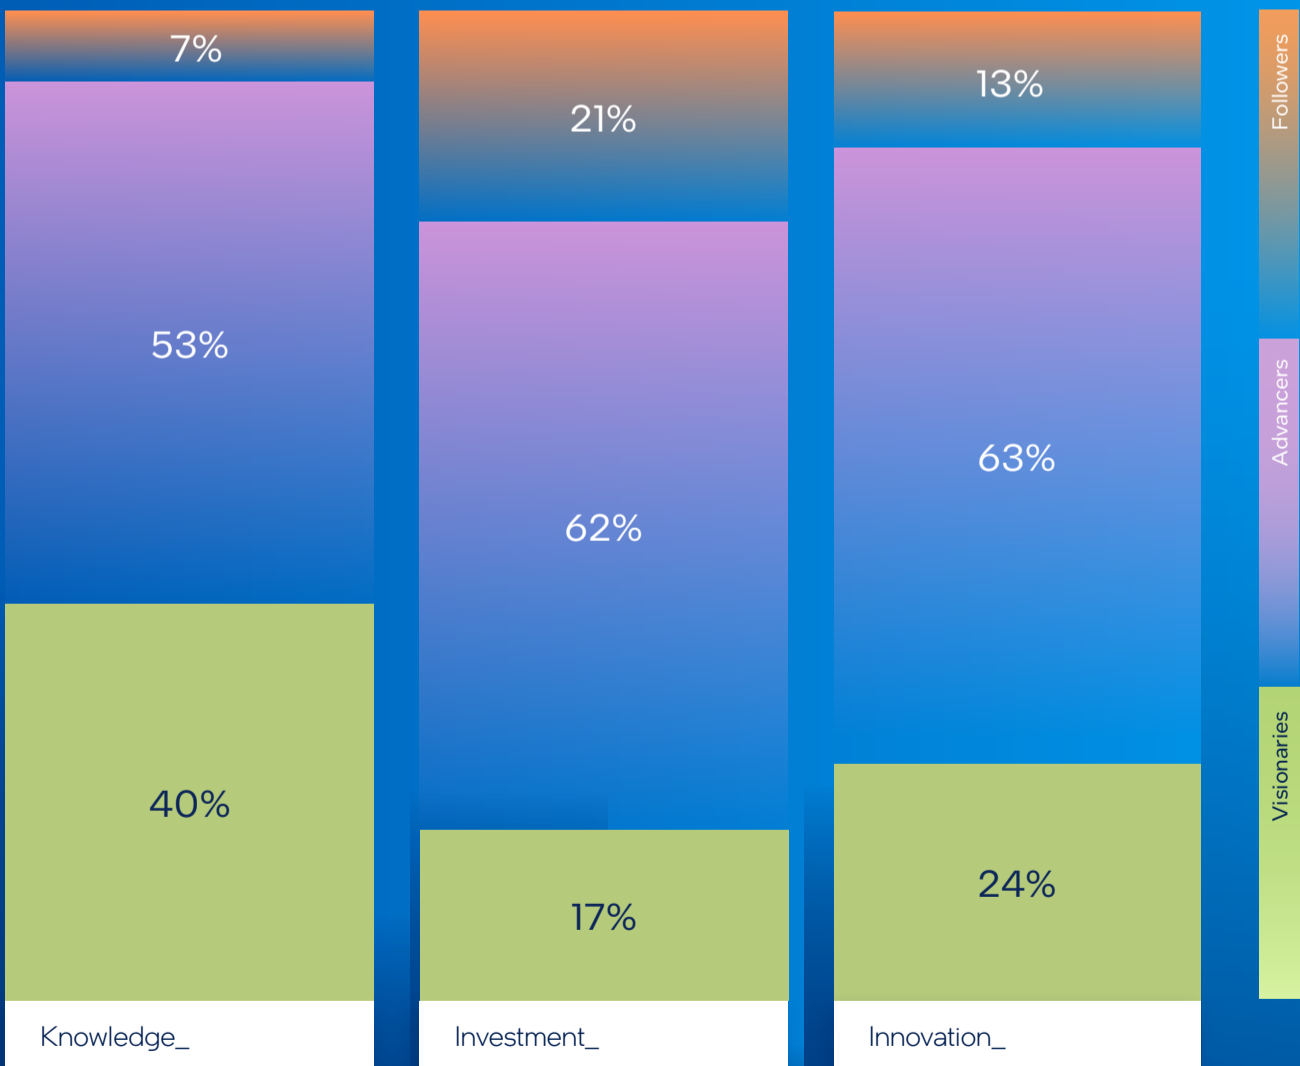

Advancers_
The companies making headway in this space (in the middle third of the scoring range).

Followers_
The companies at risk of falling behind the curve (in the bottom third of the scoring range).

Overall pillar performance across all sectors
