

# Exposing the Intention-Action Gap

The Intel Sustainable Intelligence Index reveals a missed opportunity for organizations to leverage AI for sustainable progress.

While 72% of C-suite leaders believe sustainability-related AI solutions could have a great impact on their business, only 37% report that these solutions are currently being deployed in their organization.

The organizations investing in sustainability-related AI solutions are seeing improved efficiencies across their operations – resulting in significant cost savings.

## The ROI of AI

Maximum annual savings per company
